

PROFILE OVERVIEW

Mindpik Technologies Private Limited
Since 2022

GIS

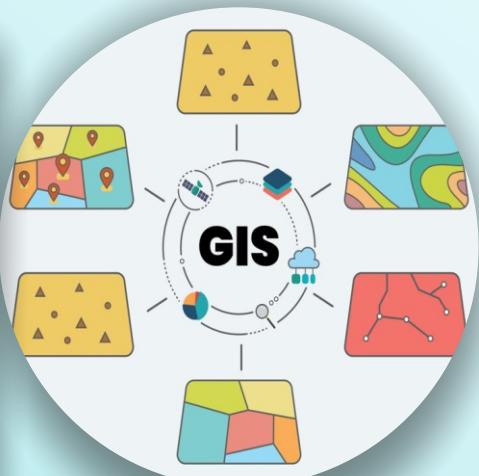

GEOGRAPHIC INFORMATIC SYSTEM (GIS) BASED APPLICATION / APPS DEVELOPMENT

GIS - Geographic Information System (GIS) software is used to store, manage, and display geographic data.

At Mindpik Technologies Pvt. Ltd., we specialize in providing top-tier Geographic Information System (GIS) services. Our team of experts ensures that geographic data is stored, managed, and displayed with the highest level of precision and efficiency. By leveraging the latest GIS software, we help businesses and organizations make informed decisions through accurate spatial analysis and data visualization. Our commitment to quality and innovation enables us to deliver customized GIS solutions that meet the unique needs of our clients, ensuring they achieve their goals with confidence.

In addition to our technical expertise, we prioritize a client-centric approach in delivering GIS services. We understand that each project has unique requirements, and we work closely with our clients to tailor our solutions accordingly. Whether it's mapping, spatial analysis, or data management, our team is dedicated to providing reliable and efficient GIS services that drive real-world results.

At Mindpik Technologies Pvt. Ltd., we are committed to staying at the forefront of GIS technology. We continuously update our skills and tools to provide cutting-edge solutions that enhance decision-making and operational efficiency. Our focus on innovation and quality ensures that our clients receive the best possible service, helping them to unlock the full potential of their geographic data.

Utility

Utilities need to have all their asset and service records in a digital form that are traceable, verifiable, and complete to ensure customer safety. Non compliances would attract stringent penalties and business disruption.

Our Solution have built up considerable expertise data capture for utility mapping as well as interpreting and digitizing information on many types of utility lines, e.g., Water mains, Sewage systems, Telephone lines, Power lines, Gas mains, Oil Pipelines, Railway/signals mapping. We perform the Geo referencing and digitizing of the existing maps and drawings and extract of all relevant utility information with precise geometry, and all dimensions with engineering know-how for placing the objects on the technically appropriate layers.

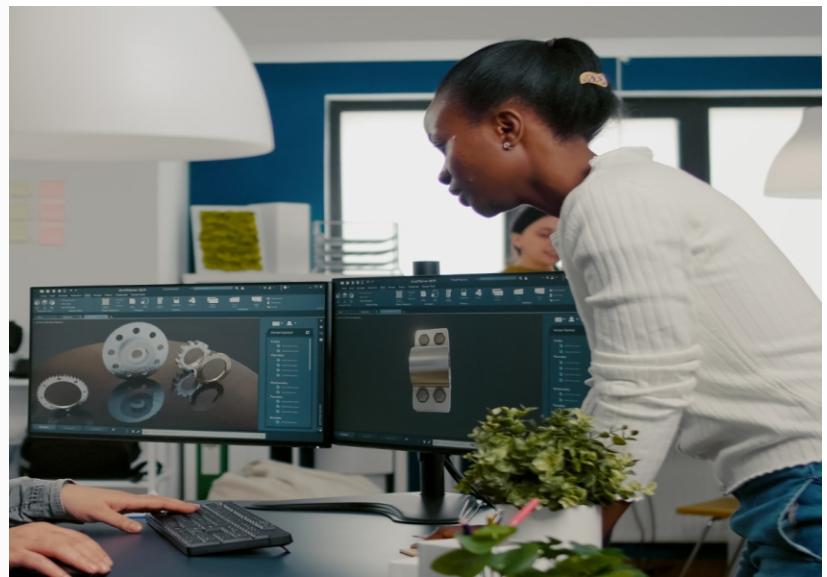

We provide the following solution:

- Utility GIS data solution
- Utility network digitization
- Utility GIS digital solution
- Utility data analysis solution

OPEN-SOURCE WEB GIS & MOBILITY AND SOFTWARE DEVELOPMENT

Open-source tools in GIS have become popular among users and programmers applying GIS. For many years, open source was primarily of great interest for academics and a relatively small group of people who wanted to share their research methodology. Increasingly, businesses are taking advantage of growing and more powerful open-source GIS software, finding that there are a lot of benefits along the way. Create your GIS in a couple of minutes using a web browser. Upload your geodata. Make an unlimited number of web maps. Share your geodata with friends and colleagues from any part of the world.

Customized Software, E-commerce Design, Development and Deployment

At Mindpik Technologies Pvt. Ltd., we excel in providing end-to-end customized software design, development, and deployment services. Our team of experienced developers works closely with clients to understand their unique business requirements and create tailored software solutions that address specific needs. From initial concept to final deployment, we ensure that every stage of the software development process is meticulously managed to deliver high-quality, scalable, and user-friendly applications.

We believe that every business is unique, and so should be its software. Our customized software solutions are designed to integrate seamlessly with existing systems and workflows, enhancing efficiency and productivity. With a focus on flexibility and adaptability, we develop software that can grow with your business, ensuring it remains relevant and effective in a constantly evolving technological landscape. Whether it's a simple application or a complex enterprise system, we are committed to delivering solutions that drive success.

In addition to design and development, we also provide comprehensive deployment services to ensure that the software is implemented smoothly and effectively. Our team handles everything from installation to configuration, ensuring that the software operates optimally in your environment. We provide ongoing support and maintenance to ensure that your software continues to perform at its best, allowing you to focus on what matters most—your business.

Products & Services

MindPik services are varied and include technical consultation, application development, IT Hardware business process automation & business, Physical Security Solution and application support. MindPik has developed a wide range of products targeting the GIS, Forest, Agriculture, Police/Defense, Cloud and Software/Hardware industry. Our products are designed in an innovative cutting-edge manner to meet the rapidly evolving and growing requirements. Our comprehensive and flexible products and solutions are designed to:

- Minimize paper work.
- Reduce administrative costs.
- Adopt international standards.
- Sustain business workflow.
- Enhance productivity.
- Assure quality customer service

Consulting & Project Management

Our company understands that successful software/Hardware development projects require good planning, knowledge transfer, and project management. We offer a full range of services including: needs and requirements analysis, business strategy review, conceptual application designs, hardware and software assessments, feasibility analysis, cost-benefit analysis, business process reviews, and consensus building. Our project managers drive the successful completion of projects using industry standard practices. They understand technical and management issues and facilitate communication between clients and the technical team.

Technical Support

Systems, browsers, and device software are constantly updating. That's why it is very important to ensure the flawless quality of your visualization and data interaction. We are here to provide a seamless and uninterrupted flow for your analytical tasks.

Our system is designed with customer usability in mind. As so, you can send a request for technical support from anywhere inside the platform via feedback ticket. We also provide expert sessions for customers who want to dive deeper into the tech environment or have any particular request.

Customized Web Design, Development & Deployment

At Mindpik Technologies Pvt. Ltd., we offer comprehensive customized web design, development, and deployment services tailored to meet your specific business needs. Our creative team of designers and developers works collaboratively with clients to build visually appealing, responsive, and user-friendly websites that enhance the digital presence of their brand.

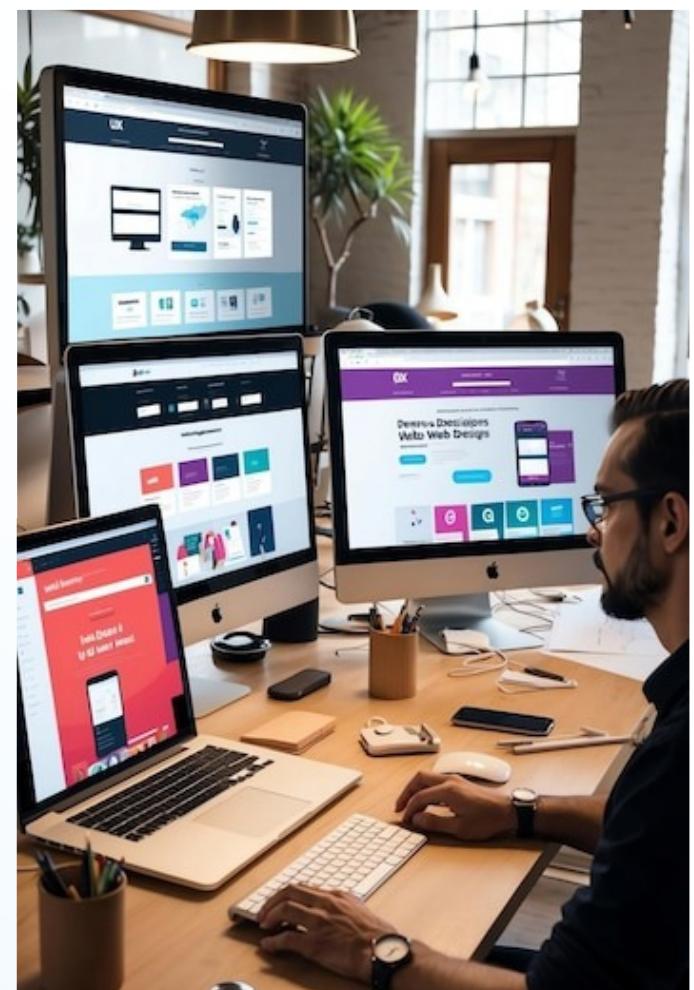

From conceptualizing unique design elements to developing powerful, scalable websites, we ensure that every aspect of your site is optimized for performance, functionality, and user engagement.

Our customized web solutions are not only aesthetically pleasing but are also built with a focus on seamless functionality and scalability. We create websites that are adaptable across all devices, ensuring a smooth user experience on desktops, tablets, and smartphones alike. Whether it's an e-commerce platform, a corporate website, or a dynamic content management system, we design and develop websites that align with your business goals and enhance your online presence.

Beyond the design and development phase, we ensure a seamless deployment process, where we handle all aspects of launching the website, from hosting setup to security configurations. Our deployment services ensure that your website runs efficiently, securely, and without interruption. We also provide ongoing support and maintenance, so your site remains up-to-date, secure, and fully functional as your business grows.

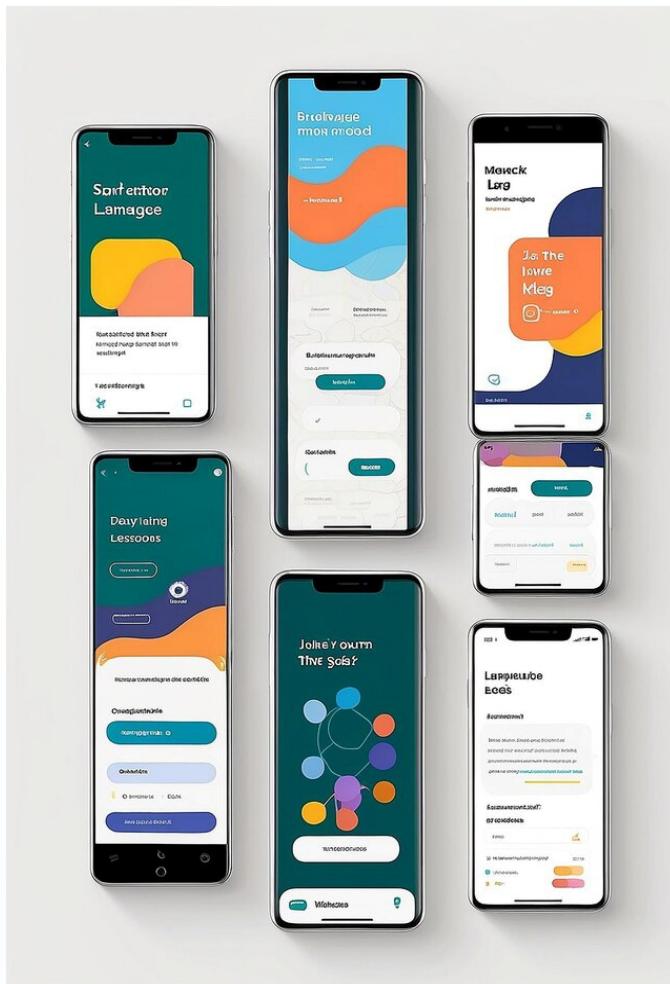

Customized App Design, Development & Deployment

At Mindpik Technologies Pvt. Ltd., we specialize in delivering customized app design, development, and deployment services tailored to meet the unique needs of your business. Our expert team works closely with you to design visually captivating, intuitive, and user-friendly mobile and web applications.

From ideation to final design, we ensure every app is crafted to provide a seamless user experience, while incorporating the latest trends in mobile app design and functionality.

We develop apps across various platforms, including iOS, Android, and web-based systems, ensuring compatibility and performance across devices. Our development process focuses on creating secure, scalable, and high-performance applications that integrate smoothly with your existing systems and meet your business objectives. Whether you're looking for a simple app or a complex, feature-rich solution, we ensure that every aspect of your app is customized to deliver results and enhance user engagement.

APP DESIGN

Once development is complete, we manage the entire deployment process, ensuring your app is launched smoothly and efficiently on the appropriate platforms. Our team handles app store submissions, testing, and configurations to ensure your app performs optimally in real-world environments. Post-launch, we offer ongoing support and updates to ensure that your app remains functional, secure, and relevant as your business evolves.

Offerings

- Requirement analysis and formation of requirement matrix.
- Selection of product to suit requirement
- Ensure quality assurance with Principal with customization.
- Supply & Installation
- IT Integration and Process Streamlining Post Installation Support.
- Managed Services for Customers.

Members

1. Indian Society of Remote Sensing (ISRS), Indian Institute of Remote Sensing (IIRS) Campus.
2. Indian Society of Agricultural Engineers (ISAE)

Certifications

1. Start-up from DIIPM
2. MSME
3. Export Import Code
4. ISO 9001:2015
5. ISO 27001:2022
6. ISO 14001:2015
7. CMMI Level 3
